# SUMMARY of CHANGE

DA PAM 350-9

Index and Description of Army Training Devices

This revision--

- Adds descriptions of Army training devices fielded since the last revision of the pamphlet
- Expands on, or corrects descriptions published in the last revision of the pamphlet
- Removes descriptions of obsolete Army training devices.
- Adds entries to the Glossary.

NOTE: The portion of the text affected by the changes are indicated by a vertical line in the outer margin of the page.

Date of issue for original and change pages are:

Original 15 February 2000

THE TOTAL NUMBER OF PAGES IN THIS PUBLICATION IS 592 CONSISTING OF THE FOLLOWING

Training

## Index and Description of Army Training Devices

**By Order of the Secretary of the Army:**

**ERIC K. SHINSEKI**  
*General, United States Army*  
*Chief of Staff*

**Official:**

**JOEL B. HUDSON**  
*Administrative Assistant to the*  
*Secretary of the Army*

**History.** This printing publishes a revision of the publication dated 1 August 1997.

**Summary.** This pamphlet presents guidance on the identification and description of training devices that have been acquired and fielded by the U.S. Army Simulation, Training and Instrumentation Command (STRICOM) and are presently being used by the Active Army and Reserve components. It is a compilation of fact sheets that describe Army training devices.

**Applicability.** This pamphlet applies to the Active Army, the Army National Guard (ARNG), and the U.S. Army Reserve (USAR).

**Suggested Improvements.** Users are invited to send comments and suggested improvements on DA Form 2028 (Recommended Changes to Publications and Blank Forms) directly to STRICOM, ATTN: AMSTI-L0, 12350 Research Parkway, Orlando, FL 32826-3276.

**Distribution.** This publication is available in electronic media only and is intended for the Active Army, the Army National Guard, and the U.S. Army Reserve.

## SECTION I INTRODUCTION

### 1-1. Purpose.

*a.* This pamphlet is published as an aid in the identification and description of training devices that were acquired and fielded by the U.S. Army Simulation, Training and Instrumentation Command (STRICOM) and are presently being used by the Active Army and Reserve components. It is not to be used as authorization for requisitioning, stockage, or issue of this equipment. Many of the training devices depicted herein have been produced in limited quantities to meet specific training requirements and have not been generally distributed. For information concerning availability, supply, and maintenance support, contact the local Training Support Center (TSC).

*b.* For each training device, there is an illustration and description, together with other pertinent data, which may be utilized in determining if the device can be used to support a training requirement. Actual weights and dimensions may vary somewhat from the average or representative values shown. For information on small-arms targets and target materials see TM 9-6920-210-14.

*c.* Information on Army commodity managed, type classified devices is contained in SB 700-20.

*d.* Information concerning Army films, videotapes, and filmstrips is contained in DOD Catalog 5040.2-C-1; information concerning graphic training aids (GTA), e.g. charts, cards, games, slides (2 by 2 inch) and transparencies (8 by 10 inch) is contained in DA Pamphlet 25-37.

*e.* A number of training devices were fabricated at various TSC's and distributed Army-wide but do not appear in this pamphlet. Information concerning availability of these types of devices, as well as locally fabricated Department of the Army Training Aids (DATA) type devices, can be obtained from the local TSC. Refer to their copy of TRADOC Pamphlet 350-9, "TRADOC Training Devices For Armywide Use". If the TSC does not have a copy, one can be obtained from the local installation publications office or by completing DA Form 17 (Requisition for Publications and Blank Forms) and sending it to the Commander, U.S. Army Training and Doctrine Command, Attn: AG Publications Stockroom, Fort Monroe, Virginia 23651.

*f.* Training device requirements for Grant Aid or Military Assistance Programs should be submitted through normal U.S. Army Security Assistance Center channels.

*g.* New training device requirements should be submitted by potential users in accordance with the provisions of AR 71-9.

### 1-2. Arrangement of Pamphlet.

This document is arranged in four major sections. They are: Section I, Introduction; Section II, Index; Section III, Training Equipment Summary Sheets; and Glossary.

*a. Index.* The Index is a list of Army training devices by device (DVC) number. This number is assigned by STRICOM during the acquisition cycle. The first two digits indicate the basic series of military equipment to which the training device relates and is consistent with those listed in AR 25-30. The remaining digits are assigned in chronological order. For example, 01-91 identifies an aviation (01) device and is the 91st device number assigned under that series. Similar training devices having a common application or training mission are assigned a letter designator (e.g. 01-91A). A higher letter indicates the most current configuration. Devices that have a series of related components are identified with a diagonal and a numerical designator (e.g. 01-91/2). Device numbers are to be used for requisitioning or for reference purposes only when a National Stock Number (NSN) has not been assigned and the item is the responsibility of STRICOM. Following is the list of basic series numbers that are used in this pamphlet.

<i>Basic Series No.</i>	<i>Type of Equipment</i>
01	Aviation
03	Chemical
05	Engineer
06	Field Artillery
07	Infantry
08	Medical
09	Ordnance
11	Signal
17	Armor
19	Military Police
20	General
23	Weapons
44	Air Defense Artillery
55	Transportation
71	Combined Arms

*b. Training Equipment Summary Sheets.* These are arranged in numerical order by DVC number and contain information and illustrations that describe each training device. Some sheets list other identifying numbers in addition to the DVC numbers. Such numbers may be a corresponding Navy number, a model number, or a mainframe number. The device nomenclature may also include a model or type number assigned to or most generally associated with the training device. Most of the information on the sheets is self-explanatory. Some topics require further explanation as described below.

(1) *Training Category/Level Utilized.* The training category is normally the same as the title for the applicable basic series number. Other designations such as "combat arms, basic weapons, and general", are used when such terms are more appropriate. The level utilized is normally one of the following three categories:

(a) *Level 1.* Applicable to post, installation, or service schools. These devices are installed as permanent fixtures such as the Bradley Fighting Vehicle Unit Conduct of Fire Trainer (Sheltered). They are generally located only at a branch service school or installation. Unit personnel may be moved to these device locations for training.

(b) *Level 2.* These devices are used in structured training, as at NCO academies, leadership courses, or division schools. These devices may be located at other than Level 1 for support for structured training.

(c) *Level 3.* These devices may generally be available at the local TSC for troop unit training. This is a broad category and may apply to various sizes of organizations from division to platoon.

(2) *Logistic Responsible Command, Service, or Agency.* This is the designated managing activity for the device. Activities managing training devices in their respective commodity areas are as follows:

(a) US Army Simulation, Training and Instrumentation Command (STRICOM), Orlando, FL 32826-3276.

(b) US Army Armament and Chemical Acquisition and Logistics Activity (ACALA) Rock Island, IL 61299-6000.

(c) US Army Communications-Electronics Command (CECOM) Fort Monmouth, NJ 07703-5006.

(d) AMCOM (Aviation and Missile Command) Redstone Arsenal, AL 35809.

(e) US Army Tank-Automotive Command (TACOM) Warren, MI 48090.

(f) US Army Aviation and Troop Command (AVSCOM) St. Louis, MO 63120-1798.

(g) Defense Personnel Support Center (DPSC) Directorate of Medical Material, Philadelphia, PA 19100.

(h) US Army Medical Materiel Agency (USAMMA) Frederick, MD 21702-5001.

## **Pamphlet 350-9**

(3) *Applicable Publications.* These publications pertain to operation and maintenance of the training device. They may be DA Technical Manuals (TM), STRICOM Technical Documents (TD), Navy NAVSO, NAVEXOS, or NAVTRADEV “P” publications, or manufacturer’s handbooks, depending on the managing activity and density of the training device in the field.

(4) *Reference Publications.* These publications pertain to operation and maintenance of the tactical equipment to which the training device is related. They may be DA Technical Manuals (TM), Field Manuals (FM), Training Circulars, or others as applicable.

(5) *Training Requirements Supported.* This information is included to assist those responsible for training to relate the training device to the specific Military Occupational Speciality Code (MOSC) task training requirements which it supports. The tasks are identified with the applicable Army Training Evaluation Program (ARTEP), Army Training Manual (ATM), Soldier’s Manual (SM), or Field Manual (FM).
